VIJAY V

Game Developer

About Me

I'm Vijay, a passionate Game Developer who loves building interactive and engaging gameplay experiences. I focus on creating clean, efficient systems that feel smooth and responsive for players. I enjoy solving problems through code and turning ideas into playable mechanics. I'm always learning new tools and improving my development workflow.

Skills:

- Unity
- C# , Git
- Code Optimization
- 3D / 2D / VR Development

Education:

Thiruvalluvar University

Projects:

STEAM (Educational Game) 3D

- STEAM is an educational game developed at Effe Consultancy for a direct client.
- The project focuses on interactive learning experiences combining science, technology, engineering, arts, and mathematics.
- I was responsible for end-to-end development, including gameplay systems, UI, and core mechanics.
- The game emphasizes user-friendly design, engagement, and effective learning through interactive gameplay.

Educational VR Industrial Simulation

- A VR-based industrial visit experience developed at Effe Consultancy for a direct client to simulate real-world environments interactively.
- The project allows users to explore industrial processes virtually, providing an educational and immersive learning experience.
- I implemented core VR interactions, navigation systems, and optimized performance for smooth and realistic exploration.
